

Inverter Welding Machine 180A BG Design RD-IW38

Art. number: **077238**

Barcode: **3800972032996**

✓ The RD-IW38 uses advanced inverter technology that enables high efficiency and stability of the welding process. This results in lower power consumption and better welding current control. The inverter electric generator can work with different types of electrodes, supporting diameters from 1.6 mm to 3.2 mm. The device offers a wide range of current regulation from 20A to 180A, making it suitable for various types of welding activities. The compact and light design of the electric generator makes it extremely convenient to carry.

TECHNICAL FEATURES

Parameter	Measure Unit	Value
Electrode diameter (mm)	mm	1.6 - 3.2
Current range (A)	A	20 - 180
Rated output current (V)	V	28
Rated voltage (V)	V	230
Rated voltage type		Corded - Electrical Grid
Protection class		IP21
